 28/10/15, 5:09 PM - Varadoos: I liked this msg .. Felt like sharing
 ðŸ~Š Are we earning to pay builders and interior designers, caterers and
 decorators? Whom do we want to impress with our highly inflated house
 properties & fat weddings? Do you remember for more than two days what
 you ate at someone's marriage? Why are we working like dogs in our
 prime years of life? How many generations do we want to feed? Most of
 us have two kids. Many have a single kid. How much is the "need" and
 how much do we actually "want"? Think about it. Would our next
 generation be incapable to earn, that we save so much for them!?! Can
 not we spare one and a half days a week for friends, family and
 self?? Do you spend even 5% of your monthly income for your self
 enjoyment? Usually...No. Why can't we enjoy simultaneously while we
 earn? Spare time to enjoy before you have slipped discs and large
 prostates. We don't own properties, we just have temporary name on
 documents. GOD laughs sarcastically, when someone says, "I am the owner
 of this land"!! Do not judge a person only by the length of his car.
 Many of our science and maths teachers were great personalities riding
 on scooters!! It is not bad to be rich, but it is very unfair, to be
 only rich. Let's get a LIFE, before life gets us, instead.... One day,
 all of us will get separated from each other; we will miss our
 conversations of everything & nothing; the dreams that we had. Days
 will pass by, months, years, until this contact becomes rare... One day
 our children will see our pictures and ask 'Who are these people?' And we
 will smile with invisible tears because a heart is touched with a strong
 word and you will say: 'IT WAS THEM THAT I HAD THE BEST DAYS OF MY LIFE
 WITH'. Send this to all your friends that you will never forget. Thank
 you for making me smile for sometime in my life.

 What is happening in malls. Apart from prices of movie and parking being
 exorbitant, what was too shocking and alarming was the cost of popcorn.
 Popcorn being charged at 100, 200 and 300 rupees.

The actual cost of these pack of popcorn shd be not more than 5 rupees.
 Even after considering the various other costs involved, they can charge
 at 20 rupees, or 30 rupees, but y more than 300% of the cost.

When the matter was took up, the vendor said, as long as we have
 takers, we will charge.

Why r we wasting our hard earned money and make these fellows rich.

Let's curb the temptation and let's boycott this popcorn and teach them a lesson.

One average show at one screen has Atleast 500 people and if 300 people buy this popcorn they make easily 25 to 30000 rupees in one show in one screen, u will be shocked to know that this money runs in lakhs per day per show in just one city.

Come on friends lets voice it up, if we stop buying popcorn at malls, it's sure within 3 months the cost will come down to Atleast 50 rupees, if not 20.

It may be forwarded to as many groups as possible so that this mesg becomes viral and reaches maximum people and we stop this looting by malls.

13/02/17, 5:27 PM - Varadoos: What Time Should You Sleep?

Is there a best time to sleep?

There is a saying that sleeping early and waking up early is good for your health. How true is that? Is it alright to sleep late and wake up late?

You actually have an amazing biological clock ticking inside your body. It is very precise. It helps to regulate your various body functions including your sleeping time.

From 11pm to 3am, most of your blood circulation concentrates in your liver. Your liver gets larger when filled with more blood. This is an important time when your body undergoes detoxification process. Your liver neutralizes and breaks down body toxins accumulated throughout the day.

However if you don't sleep at this time, your liver cannot carry out this detoxification process smoothly.

- If you sleep at 11pm, you have full 4 hours to detoxify your body.
- If you sleep at 12am, you have 3 hours.
- If you sleep at 1am, you have 2 hours.
- And if you sleep at 2am, you only have 1 hour to detoxify.

What if you sleep after 3am? Unfortunately, you won't have any time to actually detoxify your body.

If you continue with this sleeping pattern, these toxins will accumulate in your body over time. You know what happens next.

What if you sleep late and wake up late?

Have you tried going to bed very late at night? Did you realize you feel very tired the next day no matter how much you sleep?

Sleeping late and waking up late is indeed very bad for your health. Besides not having enough time to detoxify your body, you will miss out other important body functions too.

From 3am to 5am, most blood circulation concentrates in your lung. What should you do at this moment? Well, you should exercise and breathe in fresh air. Take in good energy into your body, preferably in a garden. At this time, the air is very fresh with lots of beneficial negative ions.

From 5am to 7am, most blood circulation concentrates in your large intestine. What should you do at this moment? You should poop ! Pass out all unwanted poop from your large intestine. Prepare your body to absorb more nutrients throughout the day.

From 7am to 9am, most blood circulation concentrates in your stomach. What should you do at this moment? Have your breakfast ! This is your most important meal in a day. Make sure you have all the required nutrients from your breakfast. Not having breakfast causes lots of health problems for you in the future.

There you are...the most ideal way to start your day.

After fully detoxifying your blood during your sleep, you wake up fresh to inhale beneficial energy. Then you pass out unwanted poop from your large intestine. After that, you take in balanced nutrients to prepare your body for a new day.

No wonder people living in villages or farms is healthier. They sleep early and wake up early. They follow their natural biological clock.

Living in city, we have more difficulty in following this sleeping schedule. We have good lighting, TV and internet to delay our precious sleeping time.

Follow your natural timetable.

What if you're offered a night shift job? I recommend you to reject it even if the salary is higher. For long term, you may need to spend more money for your health problems.

What if you have assignment to do until late at night? Well, why not sleep early and wake up earlier to do it? Just shift your work time from late night to early morning. You get the same time. But your body will appreciate it.

Try to follow this timing as close as possible. Make it your daily routine.

 25/02/17, 6:55 AM - DeepδŸ'¤ Â©: *SAP India CEO Ranjan Das Dies After Gym Workout*

Ranjan Das, CEO and MD of SAP-Indian subcontinent died after a massive cardiac arrest in Mumbai recently.
 One of the youngest CEOs, he was only 42.

What killed Ranjan Das?

He was very active in sports, was a fitness freak and a marathon runner.

After his workout, he collapsed with a massive heart attack and died. He is survived by his wife and two very young kids.

It was certainly a wake-up call for corporate India. However, it was even more disastrous for runners.

The question arises as to why an exceptionally active, athletic person succumbed to a heart attack at 42 years of age.

What is the real reason?

Everyone missed out a small line in the reports that *Ranjan used to manage with 4-5 hours of sleep.*

In an earlier interview of Ranjan on NDTV in the program "Boss' day out", *Ranjan Das himself admitted that he sleeps less and would love to get more sleep.*

Short sleep duration (<5 or 5-6 hours) increases risk for high BP by 350% to 500% compared to those who slept longer than 6 hours per night.

Young people (25-49 years of age) are twice as likely to get high BP if they sleep less.

Individuals who sleep less than 5 hours a night have a 3-fold increased risk of heart attacks.

Just one night of sleep loss increases very toxic substances in body such as Interleukin-6 (IL-6), Tumour necrosis factor-alpha (TNF-alpha) and C-reactive protein (CRP). They also cause cancer, arthritis and heart disease.

Sleeping for ≤ 5 hours per night leads to 39% increase in heart disease. Sleeping for ≤ 6 hours per night leads to 8% increase in heart disease.

What is ideal sleep?

In brief, sleep is composed of two stages: REM (Rapid Eye Movement) and non-REM. The former helps in mental consolidation while the latter helps in physical repair and rebuilding.

No wonder when one wakes up with an alarm clock after 5-6 hours of sleep, he/she is mentally irritable throughout the day (lack of REM sleep).

And if somebody has slept for less than 5 hours, the body is in a complete physical mess (lack of non-REM sleep), the person is tired throughout the day and immunity is way down.

CONCLUSION:

Barring stress control, Ranjan Das did everything right: eating proper food, exercising, maintaining proper weight. But he missed getting proper and adequate sleep, minimum 7 hours. That killed him.

We are playing with fire if we are sleeping less than 7 hours even if we have low stress.

Do not set your alarm clock under 7 hours.

Ranjan Das is not alone.

 11/05/17, 5:07 AM - DeepðŸ'ª Â©: just wanted to share something very important ...During training on prevention of sexual harassment at work place , trainer asked us" what should you check for when you sit in a hired cab?". The answer to that is child lock. The room was silent for a few seconds as no one had said that. The trainer went on to tell us that in the last 4 years all cases related to rape/ molestation in cabs/by cab drivers had one thing in common, The victims were in cars that had child lock on them. The trainer himself is a lawyer who has served on the advisory board for drafting the Vishakha guidelines and has represented victims.
 To my women friends on this group be aware of this the next time before you enter a cab check the child lock lever on d side of door or even better... u dont open door from outside... instead ask the driver to open the door from inside and only then enter d cab... share it with others . Tell your female friends, colleagues, sisters, daughters, wife etc.....

 05/09/17, 5:13 PM - DeepδŸ'¤ Â©: Dear Deepak,

Â

I am writing regarding your application for a work visa under dependent of worker category, based upon your partnership with your supporting partner.

Â

While I am satisfied at this stage that you are in a genuine relationship with your partner, I note that as per the evidence submitted, you both have not lived together and, therefore, you do not meet the 'living together' criteria required to assess this as a partnership under New Zealand Immigration Instructions (please refer to instruction E4.5.35).Â We are, therefore, unable to approve a visa under the Partnership category.

Â

In the interests of customer service and in order to provide you with an opportunityÂ to meet that criteria of instructions, we have granted you a Visitor Visa (under the General Category) for 09 months, to allow you both to live together in New Zealand. This visa conversion is strictly in accordance with current processes and in the interest of family reunification.

Â

Please note that though you can apply for a subsequent visa under Partnership during this period,Â you are still required to meet the 'living together in a genuine and stable relationship' criteria including providing evidence that you have established a life together.

Â

Your passport will be dispatched in next 4-5 working days.

Â
